

Cyber defence during a pandemic

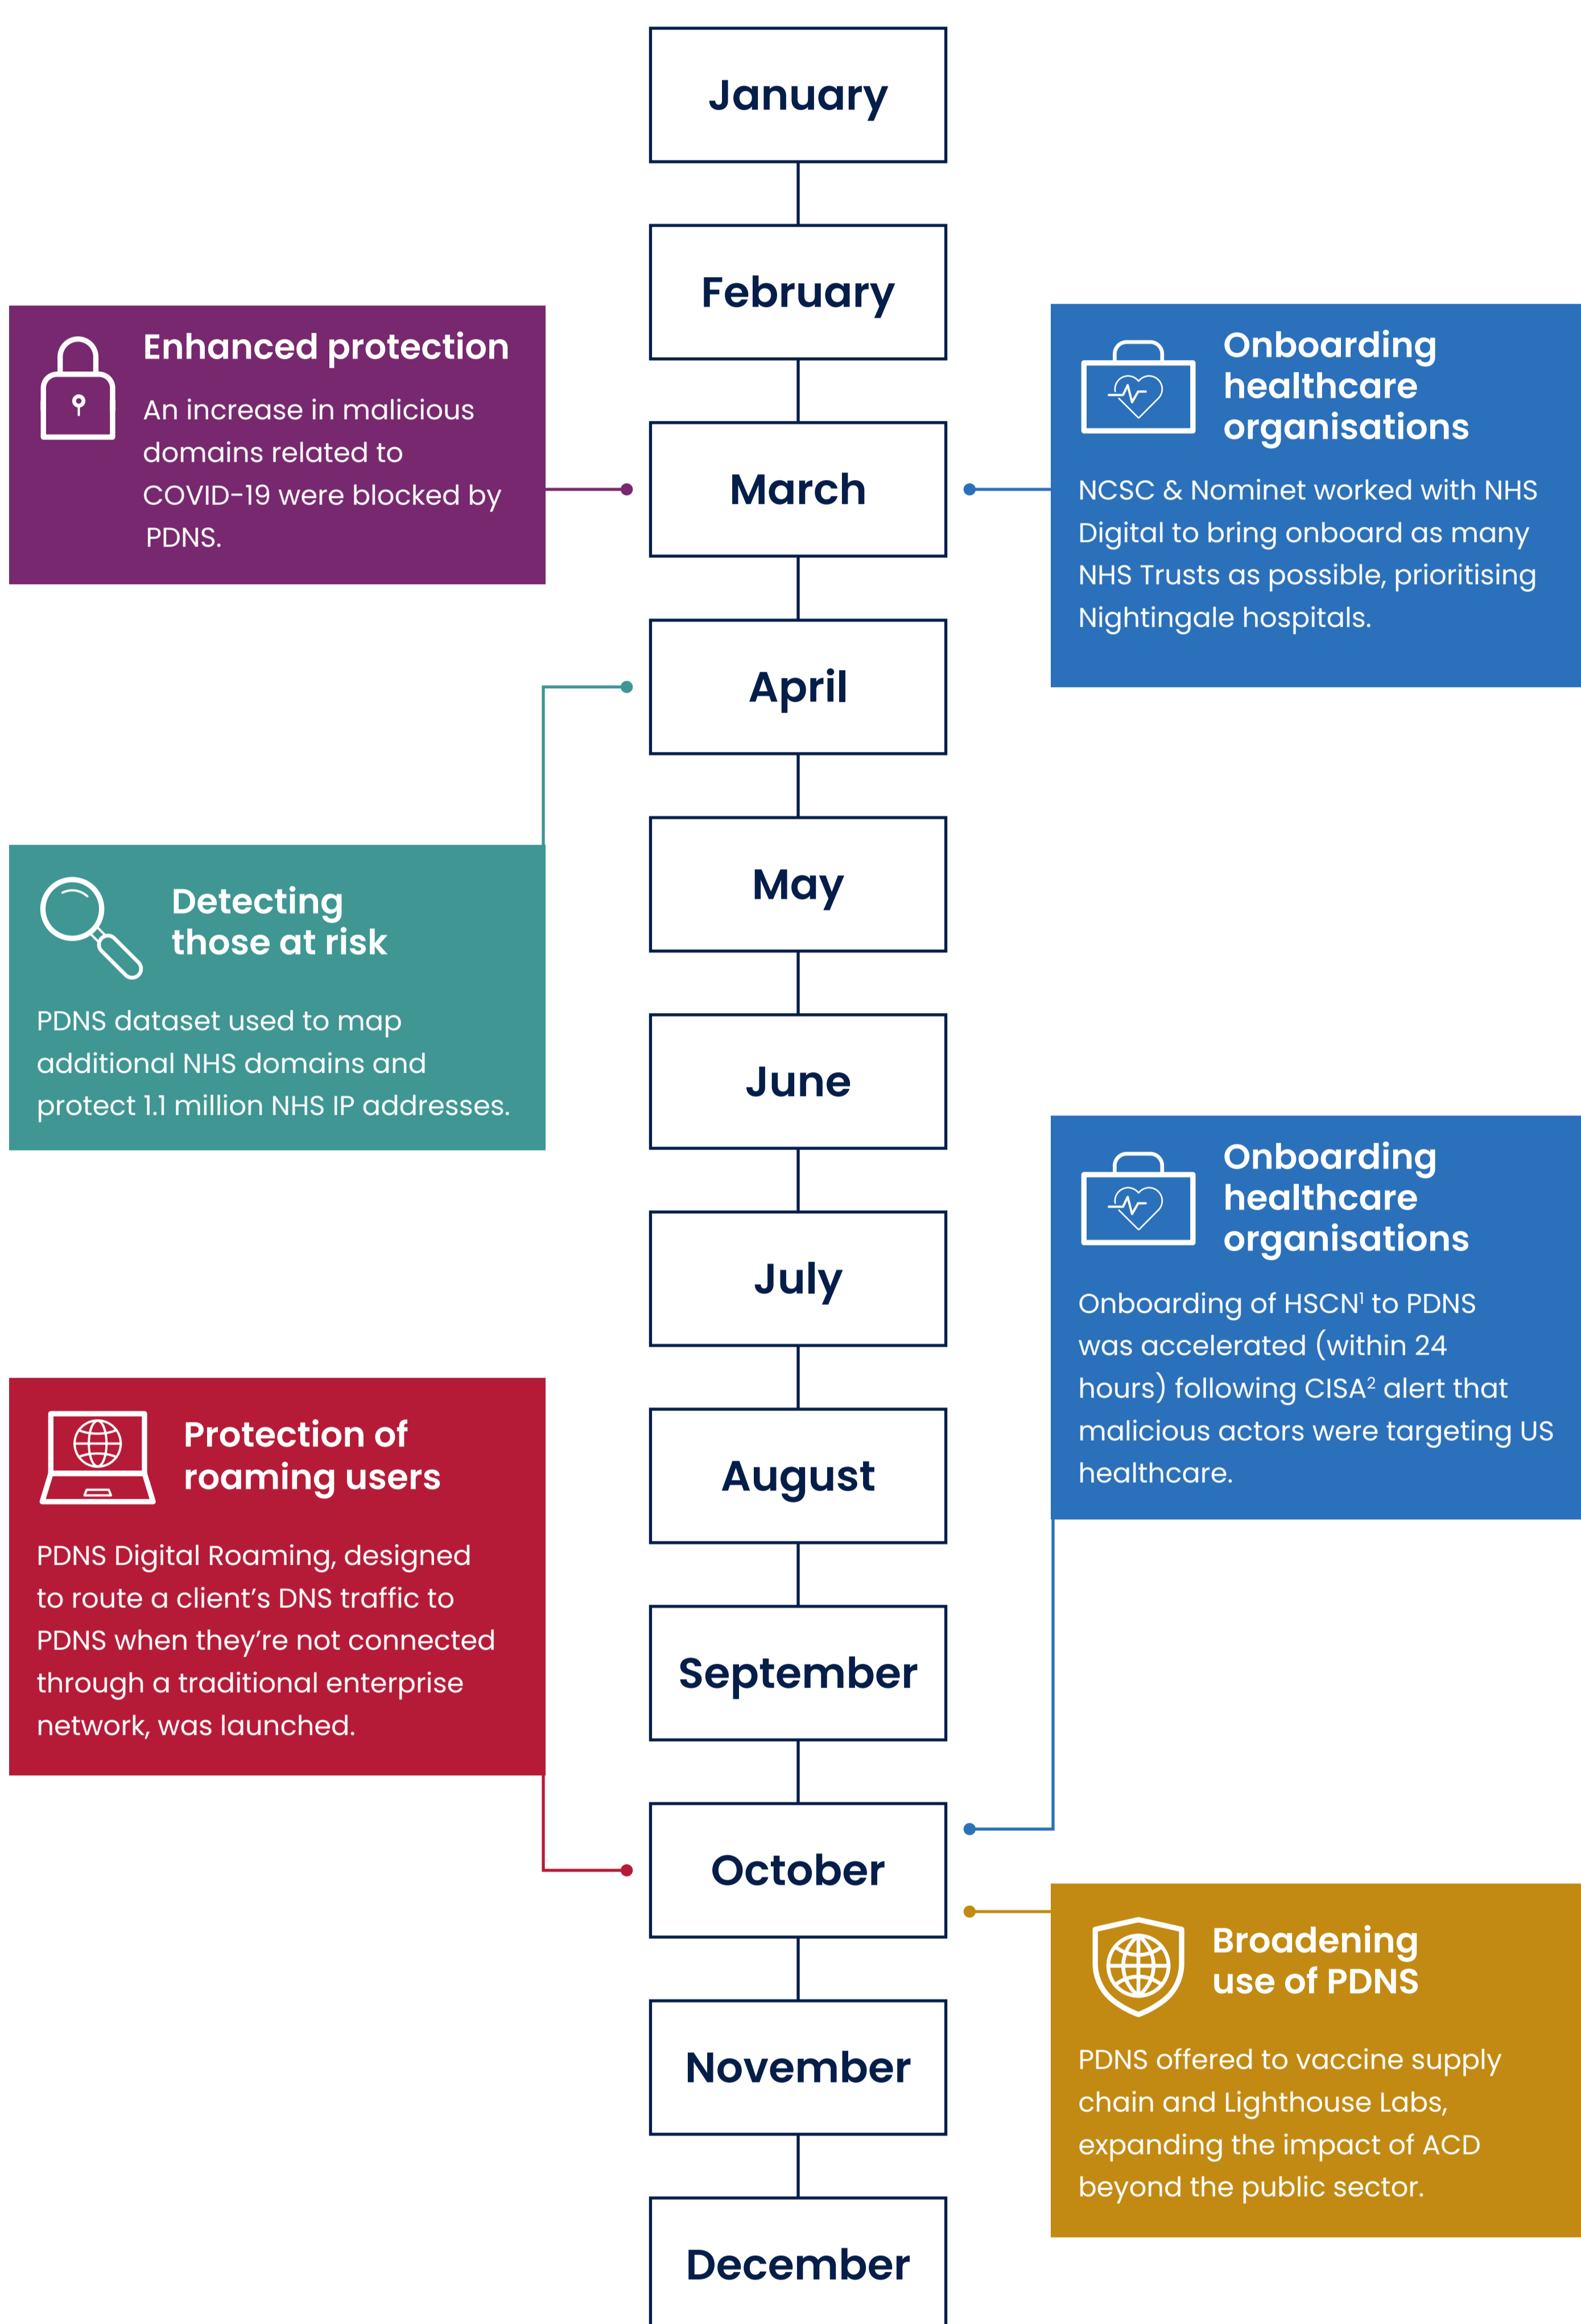

ACTIVE CYBER DEFENCE – THE FOURTH YEAR

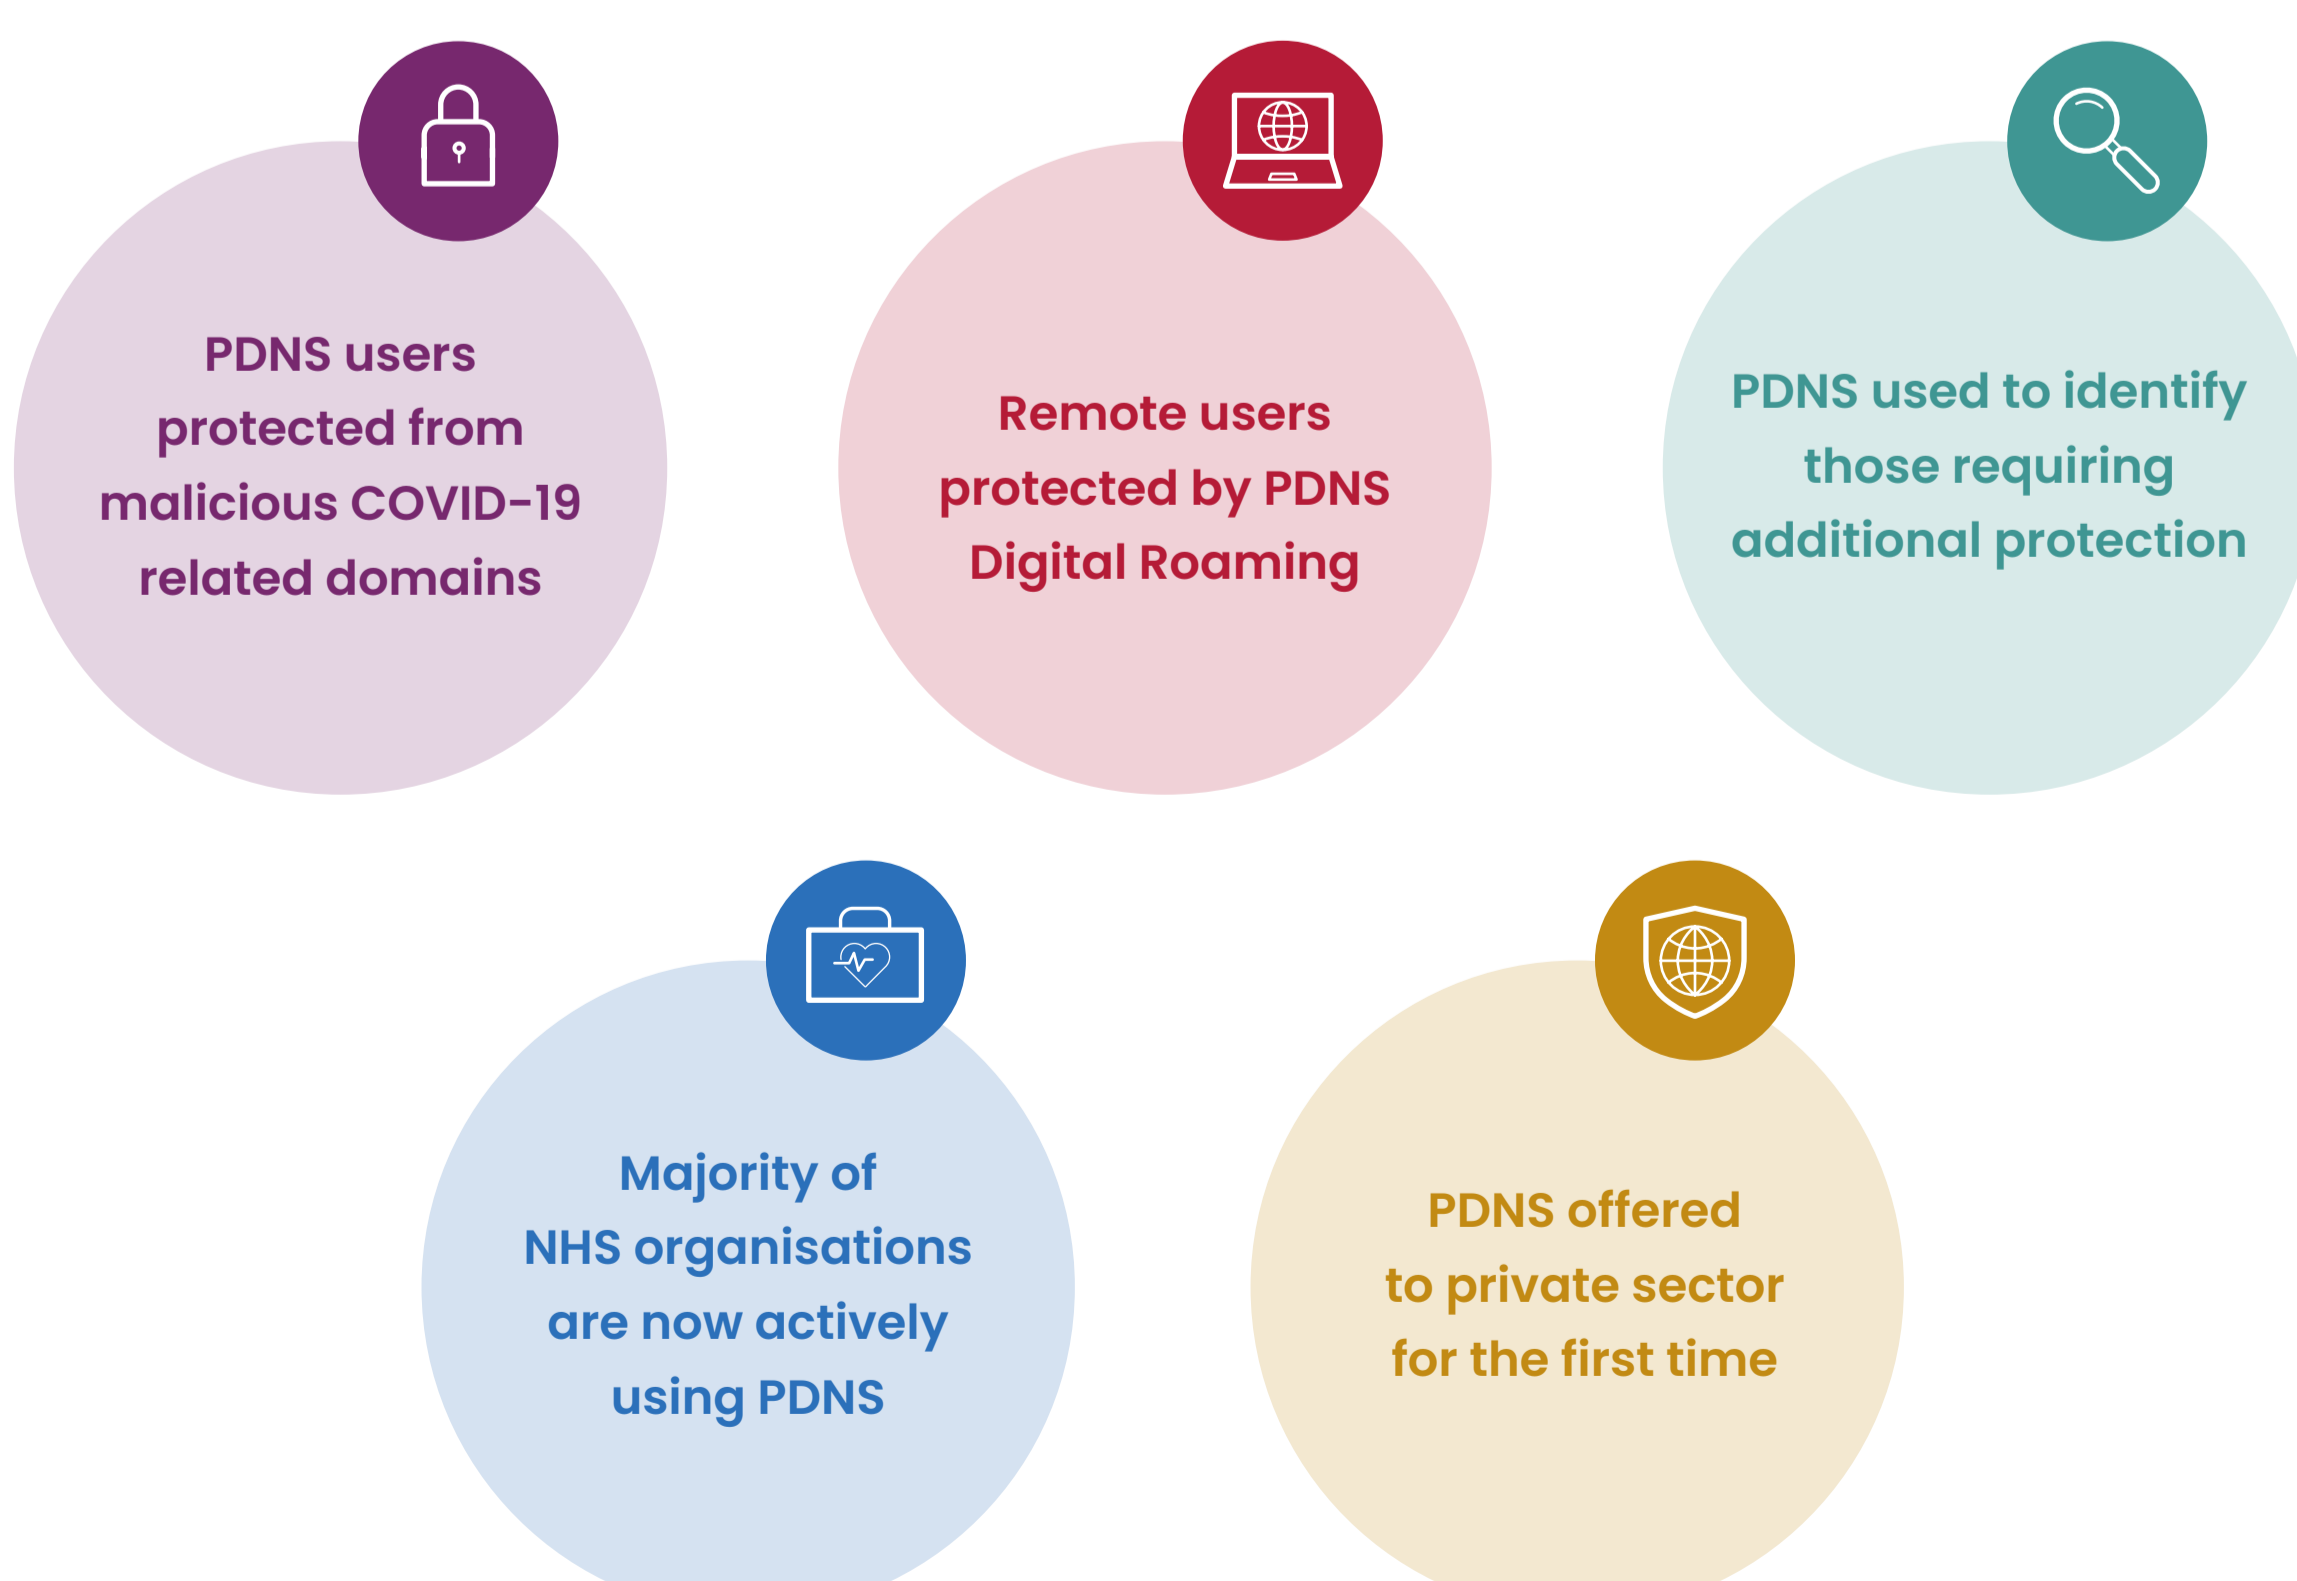

“How can we use it to help...” was the theme of the National Cyber Security Centre’s (NCSC) Active Cyber Defence (ACD) efforts in 2020. Within ACD is Protective DNS (PDNS), which is delivered by Nominet on behalf of the NCSC.

PDNS helped build more robust cyber defences during the pandemic, benefiting both those in the health sector and delivering public services.

2020 timeline

Outcomes

¹ Health and Social Care Network
² Cybersecurity & Infrastructure Security Agency
